SECURE PORTAL FOR SENSITIVE AND EXPORT CONTROLLED DATA

To Whom It May Concern;

Garlock has launched a new secure portal called SecureFile. SecureFile allows for a seamless exchange of your sensitive and/or export controlled data. SecureFile allows all of us to meet regulatory compliance requirements by providing a secure method of transmission. As a valued partner we are enclosing user instructions so that you may get enrolled and familiarize yourself with the exchange portal.

Please utilize the enclosed instructions to register for free and see how easy SecureFile is to use.

To provide the best performance there is a portal to support users in the America's and a separate portal to support Europe and APAC users.

- **The America's:** <https://securefile.enproindustries.com>
- **EU / APAC:** <https://securefileeu.enproindustries.com>

If you have any questions, please reach out to your contact at Garlock.

We look forward to collaborating with you in the future.

Respectfully,

Michael Faulkner
President, Garlock Division
